

## SWGGA Mentorship Program 2015

The Mentorship Program is a part of SWGA that was established to promote interaction between new golfers with more experienced players and to increase overall member knowledge of golf rules and course etiquette. This program provides a supportive environment where individuals can learn, gain confidence and meet new golfing buddies. This free opportunity allows individuals to be paired with mentors who will help new members establish their handicaps in time for league play, answer questions and provide insight.

Please consider joining the mentorship program this year in either a mentor or mentee capacity. We are always looking for participation; each player has the potential to enrich the SWGA through their experiences. Even if you choose not to formally enroll in the mentorship program, please feel free to participate in the clinics.

We are looking forward to an exciting year with diverse areas of interest. Once the dates, locations and topics of the meetings are determined they will be posted on the SWGA website as well as in the Daily News.

Keep an eye open for additional information.

Looking forward to a wonderful season,

Linda Hillis  
Mentorship Director
